

HICKMAN
EDGE SYSTEMS

EdgeBox RI

Perimeter Blocking Solutions

Replaces Wood Nailers

Compatible With Most Roofing Systems

Fast and Easy Installation

Designed to match virtually any wood
nailer configuration up to 16 inches square

Allows consistent R-Value
from edge to edge.

*Will Not Warp, Split or
Crack Like Wood Nailers*

EdgeBox RI

A Better Alternative To Wood Nailers

Hickman EdgeBox RI is an engineered metal blocking system that replaces traditional wood nailers at the perimeter of most low-sloped roofs.

How often do you get into a re-roofing project only to find that the existing wood nailers are a mess? Bugs, water and poor quality lumber have turned a once beautiful roof edge into a rotten, decaying mess that you have to repair!

Before ordering or sending your crew to pick up new lumber, consider EdgeBox RI from Hickman EdgeSystems.

DESCRIPTION

EdgeBox RI comes in 10-foot sections that provide a non-combustible, square retainer for rigid insulation, pre-punched for installation ease. There's nothing to correct or adjust on the fly. Just replace the bad wood nailer with EdgeBox RI.

EdgeBox RI is compatible with most commercial roofing systems, decks and insulation types. The system is made from 20 gauge galvanized steel and each section comes in two pieces for easy installation with Hickman #14 x 1.5-in. Universal Fasteners. The bottom section is secured directly to the roof deck and the top piece is fastened securely in place.

EDGEBOX RI BENEFITS

- EdgeBox RI is available in any size up to 16-inches square, but is typically made to match 2x wood nailers. For example, a 4.5- tall x 5.5-inch wide size will match three, 2- x 6-in. stacked wood nailers commonly used.
- EdgeBox RI is ANSI/SPRI/FM 4435/ES-1 tested and approved with an FM 1-540 perimeter rating and an FM 1-360 corner rating.
- EdgeBox RI is easy to install end-to-end with no need for miters.

- Provides an opportunity for the same Insulation values of the cover board used on the roof or spray foam insulation.
- Straight and true EdgeBox RI eliminates the labor needed to properly align and install multiple stacked nailers.
- Galvanized steel EdgeBox RI eliminates concerns about fastener corrosion in ACQ treated wood, and is not subject to the typical maintenance of replacing twisted, rotting or split wood nailers.
- EdgeBox RI is compatible with all Hickman Fascia systems. Finish strips and closure strips are required to close off the roof deck for a secure attachment point.

STANDARD CONFIGURATIONS AND MATERIALS*

- Edge Box RI up to 6-in. tall and 6-in. wide is manufactured from 20 gauge galvanized steel.
 - Edge Box RI from 6- to 12-in. tall is manufactured from 20 gauge galvanized steel with 20 gauge spines.
 - Edge Box RI from 12- to 16-in. tall is manufactured from 20 gauge galvanized steel with 16 gauge reinforcing spines.
- * Contact Hickman EdgeSystems at 800.892.9173 with questions.

AFFORDABLE CUSTOM SIZES TOO!

If the standard sizes do not work on your project, Hickman's Design and Engineering Team will be happy to customize EdgeBox RI products to almost any size you need, including designs that require radius curves or vaults.

APPROVALS

ANSI/SPRI/FM4435/ES-1 Tested and FM Approved
